

CONSTRUCTION SUMMIT TÜRKİYE

17-18 JUNE 2026, ANKARA

Construction
Technologies and
Innovative Building
Materials

TURKISH
CONTRACTORS
ASSOCIATION

CST2026 AGENDA

17 JUNE 2026

09.30 – 10.00

OPENING REMARKS

10.30 – 11.30

Panel-1

The Future of Construction in Türkiye and Worldwide: Global Trends (Digitalisation, Green Transition and Sustainability) and Evolving Competitive Dynamics

11.45 – 12.45

Panel-2

Digital Transformation in Construction, New Technologies and Building Materials

13.00 – 14.00

LUNCHEON

14.00 – 15.00

Panel-3

Digitalisation in the Supply Chain: Smart Logistics, Cost and Materials Management

15.15 – 16.15

Panel-4

Climate Adaptation in the Built Environment and Disaster-Resilient Structures

16.30 – 17.30

Panel-5

Mega Projects and Next-Generation Infrastructure: Contracts, Risk Management, Financing and Investment Models

18 JUNE 2026

09.30 – 10.00

OPENING REMARKS

10.30 – 11.30

Panel-1

Circular Construction: Carbon Footprint Management from Design to Operation and Net-Zero Projects

11.45 – 12.45

Panel-2

Regulation and Process Planning of Twin Transition: Legislation, Public Procurement, Contracts and Legal Processes

13.00 – 14.00

LUNCHEON

14.00 – 15.00

Panel-3

The Future of Urbanisation: Sustainable, Resilient and Smart Cities

15.15 – 16.15

Panel-4

The Future Workforce in the Construction Industry: New Talents, Skills and Competencies

16.30 – 17.30

Panel-5

Sustainable Infrastructure Financing: Green Bonds, ESG Criteria and International Financing Models

EVENT BRIEF

Construction Summit Türkiye 2026 - Construction Technologies and Innovative Building Materials

The Turkish Contractors Association (TCA) is one of Türkiye's longest-standing, independent and non-profit professional organisations, representing 129 leading construction and contracting companies. For more than five decades, Turkish contractors have successfully delivered projects across the globe, earning Türkiye a strong international reputation in the field of international contracting.

Today, the construction sector remains a fundamental pillar of economic and social development, contributing significantly to quality of life and prosperity through housing, transport, energy infrastructure and urban development. At the same time, the sector is undergoing a profound transformation driven by digitalisation, sustainability imperatives, productivity enhancement, carbon-emission reduction, innovative construction technologies and materials, and the development of a highly qualified workforce.

Within this framework, the Turkish Contractors Association will organise the **Construction Summit Türkiye 2026** on **17–18 June 2026** in Ankara, at the **Sheraton Hotel & Convention Centre**, under the main theme **“Construction Technologies and Innovative Building Materials.”**

The Summit is envisaged as a high-level, recurring international platform that will bring together key stakeholders to exchange views and experiences, while offering dedicated exhibition areas to showcase cutting-edge technologies, innovative materials and solutions shaping the future of the construction sector.

Conceived as a major international gateway to Türkiye's dynamic construction ecosystem, the Summit will gather leading representatives of the global construction and technology communities, international organisations, public authorities, financial institutions, academia and the private sector.

In addition to high-level panel discussions, the programme will include thematic and company-specific presentations, enabling participants to present concrete solutions, technologies, products and best practices.

Construction Summit Türkiye 2026 aims to foster dialogue, promote innovation and strengthen international cooperation across the construction value chain, providing a unique platform for networking and partnership development among industry leaders and decision-makers.

Further information about the Summit is available at: <https://www.constructionturkiye.com/>
