

11-13 November 2026
Istanbul Expo Center

Polyurethane Industry Exhibition

Polyurethane: The Silent Power of Modern Industry

PU Expo brings together the most innovative solutions of the polyurethane industry, uniting sector professionals at Istanbul Expo Center (IFM), **Halls 4 and 8**.

Taking place from **November 11–13, 2026**, this prestigious exhibition will host a wide range of participants – from polyurethane system manufacturers and raw material suppliers to machinery and equipment producers, as well as recycling technology companies.

Join this major gathering to stand out in the industry and discover the latest innovations shaping the future of polyurethane.

About CNG

With 23 years of experience, **CNG Expo Events** is a leading organization company that contributes to the growth of the chemical industry, enhances its international recognition, and supports the development of exports.

By organizing international fairs, congresses, and conferences in niche fields such as chemicals, coatings, adhesives, lubricants, composite, polyurethane and technical foams, it strengthens companies' global competitiveness. Additionally, through its sectoral publishing activities, CNG Expo Events promotes the continuous flow of up-to-date industry information.

About POLYDER

POLYDER (Polyurethane Industry and Importers Association) is a non-governmental organization representing the polyurethane industry in Türkiye and aiming to support its development. The association brings together manufacturers, raw material suppliers, machinery producers, and application companies under one roof, with the goal of strengthening collaboration within the sector.

With its focus on sustainability, innovation, and quality, Polyder serves as a pioneering platform dedicated to enhancing Türkiye's global competitiveness in the field of polyurethane and shaping the future of the industry.

◆ Global Polyurethane (PU) Production Report

Global polyurethane (PU) production reached 26 million tons in 2023 and continues to show a steady annual increase. With this consistent growth trend, global PU production is projected to reach 31.33 million tons by 2028.

**Global Polyurethane Production Forecast 2023–2028.*

◆ Global Polyurethane (PU) Revenue Report (USD)

The global polyurethane (PU) market was valued at USD 78.07 billion in 2023 and continues to grow steadily each year. It is expected to reach USD 93.1 billion by 2027 and USD 97.29 billion by 2028. This increase reflects the rising global demand for polyurethane products and indicates the industry's sustained growth trend.

**Global Polyurethane Market Size Forecast 2023–2028 (in USD Billion). 2025. Industry Forecast Report.*

PU PRODUCTION IN TÜRKİYE, 2024

ESTIMATED VISITOR DISTRIBUTION OF TARGET POLYURETHANE SECTORS

Why Should You Participate?

◆ The Only Platform That Unites All Segments of the Industry

Polyols, isocyanates, system manufacturers, additives, elastomers, machinery, and equipment producers – we bring together every link of the polyurethane value chain under one roof. This unique platform provides an excellent opportunity to establish strong collaborations between manufacturers, suppliers, and end users.

◆ Discover the Latest Technologies and Solutions

Visitors will explore the most up-to-date innovations in the industry – from polyurethane systems and coating technologies to automation, injection systems, and recycling solutions. For exhibitors, this represents an exceptional opportunity to showcase their products live and demonstrate their technological excellence.

◆ A Highly Qualified and Focused Visitor Profile

PU Expo brings together professional visitors from the construction, automotive, home appliances, furniture, insulation, coating, and composite industries. You can connect directly with decision-makers and hold one-on-one meetings with potential business partners.

◆ An Effective Gateway to International Markets

Türkiye's strategic position serves as a crossroads for industry professionals from Europe, the Middle East, Africa, and Asia. This provides exhibitors with the opportunity to build not only local but also international business networks and to explore new export opportunities.

**BOUNDLESS
FLEXIBILITY,
EXCEPTIONAL
STRENGTH.**

EXHIBITOR PROFILE

- Polyols & Isocyanates
- Polyurethane System Manufacturers
- Raw Materials & Auxiliary Chemicals
- Elastomers
- Construction Chemicals
- Polyurea & Polyurethane Coatings
- Additives
- Sealants
- Polyurethane Foam
- PUR-PIR Sandwich Panels
- Polyurethane Composites
- Analytical & Testing Services
- Laboratory & Certification Services
- Liquid Mixing & Dispensing Units
- Automation & Control Systems
- Injection & Molding Systems
- Casting & Molding Technology
- Machinery & Equipment
- Recycling Technologies & Solutions
- Research & Development
- Associations, Federations & Universities
- Others

VISITOR PROFILE

- Aerospace
- Automotive
- Building & Construction
- Coatings & Adhesives
- Composite Wood Panels
- Footwear & Sportswear
- Furniture & Bedding
- Household Goods
- Marine/Offshore
- Refrigerators & Freezers
- Transportation
- Other Application
